SCIENTIFIC PROGRAMME

ACKNOWLEDGEMENTS

The Conference is organized by the Working Group on Myocardial and Pericardial Diseases of the European Society of Cardiology.

The working group is grateful for the joint sessions to the Heart Failure Association of the European Society of Cardiology, World Scleroderma Foundation (WSF), and European Scleroderma Trials and Research group (EUSTAR). The Working Group is highly appreciating the scientific support and logistics provided by the Serbian Academy of Sciences and Arts, Serbian Medical Association, Faculty of Medicine, University of Belgrade, Faculty of Music, Arts University of Belgrade, and Clinical Centre of Serbia in Belgrade.

**We would like to thank our sponsors,
exhibitors and participants for making this
conference possible.**

WELCOME

Dear Colleagues,

On behalf of the organising and scientific committee it is a great pleasure to meet you at the 15th Annual Conference of the Working Group (WG) on Myocardial and Pericardial Diseases of the European Society of Cardiology in Belgrade, Serbia.

The Conference is back in Belgrade for the third time, after very successful meetings organized in 2006 and 2009 by Professor Petar Seferović.

The aim of the Conference is to communicate progress in basic science, diagnosis, and management of myocardial and pericardial diseases to a broad audience. In order to expand the interaction and cooperation of the WG with other related areas, WGs and Associations in the ESC and world-wide, the Scientific Program will include sessions on the management of heart failure in cardiomyopathies and constrictive pericarditis, invasive diagnostic and interventional procedures, cardiotoxicity, myocardial and pericardial involvement in malignancies, arrhythmology, electrophysiology and pacing, sports, and surgical management of cardiomyopathies and pericardial disease. Systemic autoimmune diseases and metabolic disorders involving the heart and the pericardium will be elaborated in the special track. Advances in the treatment including new perspectives with biological drugs, immunomodulation and enzyme replacing therapies will be thoroughly reviewed as well.

"Myocardial & Pericardial Experts of Tomorrow" (MY-PET) track will include educational courses dedicated to cardiovascular pathology with focus on inflammation, fibrosis and PCR for cardiotropic viruses but also cardiovascular genetics, and integrated imaging in myo/pericardial diseases. Young investigators awards sessions will include selected original research and case presentations by the first authors 40 years old or less.

We trust you will enjoy the programme and also the exciting and vibrant city of Belgrade.
